

RBM Standard Table Top Collection

The standard selections in our factory stock in Nässjö are marked X in table and consists of 22 mm melamine table tops and 24 mm laminate table tops both with 2 mm shock absorbing ABS edges. Delivery time is within 15 working days from factory. Other laminate table tops (extended) are also available. Table tops in laminate are a highly resistant, hygienic and durable solution: laminate provides a flexible surface with numerous applications, from traditional solutions to new, creative trends.

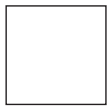

High pressure laminate consists of several layers of special decorative paper or real wood veneer, which is impregnated with heat-treated synthetic resins. The layers are pressed together using heat and high pressure. The table tops also have certain heat-resistant properties. The robust surface requires no maintenance, only cleaning with a mild detergent.

A melamine table top is a durable solution that requires no maintenance and is easy to clean. The core of the melamine top consists of chipboard, onto which melamine foil is glued and which is then finished with a 2 mm shock absorbing ABS edge. The surface is very durable and scratch-resistant and also heat-resistant. Clean and wipe with a moist cloth.

All standard models shown in the table below come with the following table tops, and are available in stock:

Melamine M3227
Beech

Laminate 2255
Polar white

Laminate 7927
Folkstone grey
